New OSHA Crane and Derrick Standard (1926.1400)

Paul DeMattie, District Sales Manager and Product Application Trainer, for The Crosby Group, will discuss the latest rulings and information about the **New OSHA Crane and Derrick Standard (1926.1400)** as it relates to the requirements for "Qualified Riggers" in construction. He will also discuss how OSHA has updated its standards regulating the use of slings for general industry (1910.184), and 1926.251 in construction. This final rule became effective on July 8, 2011.

Paul has been involved in the rigging industry for over 12 years. He holds a Bachelor of Science degree in Business Administration from The University of New Haven, and a Master's Degree in Management from Albertus Magnus College. Paul is also a certified rigger with the NCCCO.

The Crosby Group is the recognized world-wide leader in manufacturing accessories for material handling. As an authorized Crosby Product Application Trainer, Paul conducts many 4-hour, and 8-hour rigging courses to end users at no charge. Crosby's rigging training courses are known throughout the industry for complete coverage of industry standards and application information as it relates to rigging.
