

Lean Construction  
EDUCATION PROGRAM

**AGCCT**  
AGC OF CONNECTICUT

AGC's LEAN Construction Education Program

## UNIT 4: THE LAST PLANNER® SYSTEM

Friday, March 17, 2017 | 12:30 pm – 4:30 pm

AGC of Connecticut is pleased to offer AGC of America's:

**LEAN Construction Unit 4: The Last Planner® System**, a half-day, instructor-led course that shows how to conduct make-ready and weekly work planning sessions.

Following successful completion of this course, participants will be able to:

- Apply the Last Planner® System on a project;
- Hold make-ready and weekly work planning sessions;
- Calculate, track and analyze percent plan complete for a project.

**Date:** Friday, March 17, 2017, 12:30 pm – 4:30 pm  
**Location:** CCIA, 912 Silas Deane Highway, Suite 112, Wethersfield, CT  
**Instructor:** Megan C. Stanton, ASKM & Associates  
**Cost:** \$275 per person (*members*) (Includes 6.35% CT Sales Tax)  
\$375 per person (*non-members*) (Includes 6.35% CT Sales Tax)

*Checks payable to AGC of Connecticut*

**UNIT 4: THE LAST PLANNER® SYSTEM**  
Friday, March 17, 2017 | 12:30 pm – 4:30 pm

*An Associated General Contractors of America (AGC) Education Program*

**About AGC's LEAN Construction Education Program**

To develop the tools needed to build lean, the Associated General Contractors of America (AGC) has developed the Lean Construction Education Program. Construction professionals at all experience levels will learn the building blocks necessary to transform their projects and companies into a lean operating system.

**Overview of The Last Planner System®**

- ✓ Session 1 revisits the LPS and introduces the concept of production planning, as contrasted to project management. We then consider the difference between reactive and proactive control. We also consider the role of commitment – as the term is used in Lean Construction.
- ✓ Session 2 delves deeper into the LPS with a focus on the production planning pieces – the six-week look-ahead, the weekly work plan and the daily huddles – showing how each is created. We also look at documenting constraints and calculating the percent plan complete. Finally, we use the five whys to get to the root cause of a failure.
- ✓ Session 3 is largely dedicated to a simulation of the LPS using a sample project. A six-week look-ahead schedule is created. The simulation concludes with the weekly work planning meeting. We also look at methods to encourage subcontractor participation in the planning meetings.
